What Am I?

See me on the farm,
see me at school
or maybe see me at the zoo

Introduction

I would like to say thanks for reading my book. This book is based on trying to describe certain items as basically as I could for all ages, from pre-school on up. Children should be able to guess at least three items per chapter. This idea is based on things children learn over the years from watching TV, going to the zoo, or by storytelling from their parents from different books.

This book was made to be read to by others, mother, father, or by friends or relatives.

I dedicate this book to Amanda & Chris, my son and daughter. A special thanks to a parent at my school - *Mrs. Louella Giron* - for her fantastic work on the illustrations.

I also write books on other subjects, both fiction and nonfiction.

I love to write to help people learn different things, and to keep their interest in reading. Happy reading to all!
